

Facebook Poll on Helios Project

Some of you may be aware I conducted a simple poll on the Community Facebook page to try to get an idea of the views of the community to help in decision making on our stance. I did hope there would a strong opinion in one direction or another.

I simply asked if people were FOR , AGAINST or NEUTRAL on the proposed solar development.

Results:

Total Votes: 173.

For the Project: 63 Votes 36%

Neutral: 44 Votes 25%

Against: 66 Votes 39%

So as you can see a quarter of people don't have a strong view either way and it is an even balance between those for and against it with a very small majority of people against.

I personally did not vote and 173 people although a significant number is not everyone in the village.
